

Permakulturni inštitut Maribor

Jernej Domanjko, M. S. (mech. Eng.)
Permakulturni Inštitut Maribor

Povzetek

Permakulturni Inštitut Maribor je neprofitna okoljevarstvena organizacija, ki primarno skrbi za ozaveščanje javnosti o problemih družbe ter razvija in prikazuje trajnostne rešitve.

Na svojih Učno demonstracijskih centrih vpeljujemo principe permakulture v običajne gospodarske panoge kot so kmetijstvo, gradbeništvo, energetika... ter jih želimo na tak način spremeniti v trajnostne in narediti komercialno zanimive, saj bodo le tako ti prijemi upravičeno sprejeti kot del konkurenčnih gospodarskih praks.

Naše vrednote temeljijo na zakonih narave, saj le ta celostno in trajnostno upravlja s svojim sistemom in temelji na zakonih, ki enakovredno obravnavajo vse njene dele.

Naša direktiva:

Edina etična odločitev je, da sprejmemo odgovornost za svoj obstoj in obstoj naših otrok. Naredimo to zdaj!

Abstract

The Permaculture Institute Maribor is a non-profit environmental organization, which primarily focuses on raising public awareness of the problems of society and developing and demonstrating sustainable solutions. At their Learning Demonstration Centers, they introduce the principles of permaculture into the usual industries such as agriculture, construction, energy ... They want to change them into sustainable ones and make them commercially interesting, as they will justifiably be accepted as part of competitive economic practices. Their values are based on the laws of nature, because it alone manages the whole and sustainability its system and is based on laws that treat all parts of it equally.

The PIM's directive: The only ethical decision is to accept responsibility for the existence and the existence of our children. Let's do it now!

Permakulturni
inštitut Maribor

Splošni podatki

Naziv pravne osebe: Permakulturni inštitut Maribor, so. p.
Skrajšan naziv: PI Maribor
Sedež: Betnavska cesta 116, 2000 Maribor
Sedež demonstracijskega centra: Dalmatinova ulica 13, 2000 Maribor;
Trčova, 2229 Malečnik; Trdobjci 79, 2285 Zgornji Leskovec
Telefon: +386 40 884 243 Jernej Domanjko
+386 41 797 144 Matej Kline
E-pošta : info@permakulturni-institut.si
Delovni čas: Vsak delovnik med 8:00 in 16:00 ter v soboto po dogovoru
ID za DDV: 76279197
Matična številka: 7164041000
Transakcijski račun: SI56 6100 0001 5084 332
Ustanovitelj: MATEJ KLINE, permakulturni učitelj in načrtovalec
Datum ustanovitve: 20.10.2016
Direktor: Jernej Domanjko, mag. str.

Povod za ustanovitev

Ustanovitev neprofitne organizacije Permakulturni inštitut Maribor (v nadaljevanju PIM) je posledica trenutnih katastrofalnih smeri globalnih trendov politike, industrije, življenjskih standardov in enormnih ekonomskih razlik med posamezniki, destruktivnega ravnanja z okoljem, zavajajočega in nekorektnega ozaveščanja širše javnosti ter nemoralnega, neetičnega in neodgovornega vedenja družbe.

Nove generacije se za izboljšanje stanja našega planeta borijo na poslovnih in političnih ter družbeno-odgovornih frontah. Tej borbi se je priključil tudi PIM. Preprečiti želimo dokazano destruktivno ravnanje konvencionalne agronomije in ostalih ne-trajnostnih sistemov iz različnih aspektov našega življenja. To destruktivno ravnanje je ključni dejavnik za trenutno stanje naše civilizacije in Planeta.

Poslanstvo

Permakulturni inštitut Maribor skrbi primarno za ozaveščanje javnosti o trajnostnih sistemih, njihovem načrtovanju in ekonomski upravičenosti, predvsem pa o nuji po njihovi čim hitrejši adaptaciji. Na PIM si prizadevamo spremeniti konvencionalno destruktivno upravljanje z naravnimi viri v trajnostno upravljanje narave, ki zajema širok spekter dejavnikov potrebnih za kakovostno življenje vsakega posameznika.

Svoje poslanstvo izpolnjuje PIM z grajenjem demonstracijskih centrov, ki iz prve roke prikazujejo pozitivni doprinos trajnostnega načrtovanja, javne predstavitve in predavanja tako za Slovenske državljane kot tudi tujce.

Inovacije, izboljšave, nenehna optimizacija in raziskave na področju trajnostnih življenjskih sistemov so del vsakodnevnega dela na PIM.

Vizija

- Podeljevanje internacionalno priznanega certifikata, ki predstavlja nadstandard ekološki pridelavi hrane in upošteva trajnostna načela permakulturnega načrtovanja (tako pridelamo kakovostna živila in sočasno regeneriramo okolje, kar drastično povečuje vrednost hranilnih snovi v pridelku).
- Izgradnja učno-demonstracijskih centrov po celotni Sloveniji in vodenje izobraževanj (predvsem praktični prikazi) za interesente iz Slovenije in celega sveta.
- Širjenje svojih prepričanj izven meja Slovenije, globalno povezovanje z isto-mislečimi in vključevanje širše javnosti v našo iniciativo.

Vrednote

Sledimo naravi, saj le ta celostno in trajnostno upravlja s svojim sistemom in temelji na zakonih, ki enakovredno obravnavajo vse njene dele. Vrednote, ki upoštevajo naravne zakone, kjer je vsak del enakovredno pomemben, so temelji, na katerih stoji Permakulturni inštitut Maribor.

Naše vrednote lahko razdelimo v tri sklope:

- Skrb za Zemljo, njenih živih in neživih sistemov. Središče je življenjska etika. Vsa živa bitja imajo višjo vrednost.
- Skrb za ljudi. Ljudje so center permakulturnega sistema. Če lahko sami poskrbimo za svoje osnovne potrebe, nam ni treba sodelovati v obsežnem uničevanju Zemlje.

- Vračilo viškov v prvi dve etični načeli. Ko imamo zadoščene svoje osnovne potrebe in smo si po najboljših zmožnostih uredili svoja domovanja, lahko razširimo svoj vpliv in priskočimo na pomoč drugim, da bi tudi oni dosegli to, kar mi že imamo.

Dejavnosti

Izobraževanja

Ključni del PIM predstavljaj širok spekter intenzivnih praktično-teoretičnih izobraževanj, ki temeljijo na dobrih praksah povezovanja živih in neživih sistemov v celote, kjer vsak del žive in nežive narave, v kolikor je pravilno načrtovan in izveden, pripomore k večji produktivnosti, manjši porabi sredstev ter večji kakovosti končnih produktov. Ponujamo PDC (Permacultural design certificate) in trimesečno pripravništvo teoretičnih in praktičnih znanj permakulture. To sta zgolj dva izmed mnogih tečajev, ki jih ponuja PIM. Preverite nabor izobraževanj na www.permakulturni-institut.si.

Ponudba prehranskih produktov ekosistemske pridelave (nad-ekološka pridelava)

Naši demonstracijski centri ponujajo produkte, pridelane brez oranja, škropljenja s fitofarmaceutskimi sredstvi, pretiranega zalivanja, gnojenja z umetnimi gnojili, uporabe farmacije in nemoralnih prijemov. Vsi produkti so sveži (lokalna pridelava) in še na dan naročila pripravljene za predajo našim zvestim strankam, ki jim tudi ekološko certificirana živila ne ponujajo ustrezne kakovosti. Tako si lahko preko spletne strani www.zabojcekzdravja.si vsak naroči svoj zabojček svežih produktov in si popestri svoj jedilnik s kakovostjo, ki je drugje ni mogoče dobiti.

Načrtovanje trajnostnih sistemov.

Tukaj so zajeti sistemi iz večine današnjih panog. Od gradnje bivališč, agronomije, vodnih virov, energetskih virov in ekonomskih sistemov. Skupaj z našimi somišljeniki načrtujemo njim zanimive in nujne sisteme. Naj si bodo ti pogojeni z večjim zaslužkom pri pridelavi in prodaji živil, težnja k samooskrbi in samozadostnosti ali pa jim nudimo pomoč pri povezovanju v iniciativo, kjer lahko tudi brez velikih denarnih investicij pridejo do zelenega cilja. Več o projektih na www.permakulturni-institut.si/projekti.

Ozaveščanje širše javnosti

Sodelovanje v televizijskih oddajah, objave člankov na naših spletnih portalih, objava knjig, ki opisujejo dobre trajnostne prakse, objava člankov v revijah in časopisih, rednih javnih predstavitev naših demonstracijskih centrov, mladinski projekti in projekti z vrtci ter sodelovanje na sejnih je zgolj nekaj dejavnosti, s katerimi se trudimo ozavestiti ljudi o resnem problemu destrukcije planeta, predvsem pa o prepotrebni enostavnih rešitvah, ki jih lahko vsak posameznik z malo truda implementira v svoje življenje.

Prestrukturiranje kmetijske infrastrukture

Če želimo nahraniti svetovno prebivalstvo s trajnostno agronomijo, ki se poslužuje ekosistemskega načina pridelave, bo potrebno prilagoditi določne del kmetijske mehanizacije oziroma njene infrastrukture. Raziskovalna dejavnost inštituta skrbi za testiranje in implementacijo novih strojev in konstantnim izboljševanjem njihove učinkovitosti za bolj kakovostno in manj naporno kmetijstvo. Tako se povezujemo s proizvajalci kmetijske mehanizacije in skupaj načrtujemo ter izdelujemo in optimiziramo kmetijske stroje za potrebe trajnostnih načinov pridelave.

Izgradnja demonstracijskih centrov

Število demonstracijskih centrov bo pomembno vplivalo na razvoj ekosistemske pridelave v Sloveniji in tujini. Več kot jih bomo uspeli postaviti, lažje se bodo interesenti odločali za prehod na ekosistemsko pridelavo. Centri nudijo svetovanje in strokovno podporo ter pomoč pri načrtovanju sistemov v nastajanju. Vsi ekosistemski pridelovalci so preko centrov povezani, kar ustvarja mrežo ljudi, ki med seboj delijo izkušnje, trgujejo s storitvami in izmenjujejo produkte, prav tako pa lahko svoje izkušnje predstavijo na predavanjih ali spletnih portalih Permakulturnega inštituta Maribor.

Novačenje permakulturnih načrtovalcev in povezovanje enako mislečih v skupno iniciativo

Naša iniciativa temelji na širjenju zavesti o pomembnosti trajnostnih sistemov, zato je ključen del PIM novačenje enako mislečih ljudi, ki prav tako želijo določene spremembe na področju kakovosti življenja. Z opravljenimi izobraževanji, željami po delu in ostalimi načini širjenja zavesti, lahko vsak postane del naše ekipe in tako doda svoje k doseganju našega skupnega cilja. Naj bo to prostovoljstvo, pomoč v obliki zunanjšega sodelavca, zaposlitev na PIM ali ustanovitev partnerske družbe, materialna ali finančna sponzorstva, donacije, nove ideje, promocije in drugo, so več kot dobrodošli načini pomoči. inštitut Maribor

General data

Legal entity's name:	Permakulturni inštitut Maribor, so. p.
Short name:	PI Maribor
Seat:	Betnavska cesta 116, 2000 Maribor
Demonstration center's seat:	Dalmatinova ulica 13, 2000 Maribor Trčova, 2229 Malečnik Trdobjci 79, 2285 Zgornji Leskovec
Phone:	+386 40 884 243 Jernej Domanjko +386 41 797 144 Matej Kline
E-mail:	info@permakulturni-institut.si
Office hours:	Every work day 8:00 - 16:00, Saturday by agreement
ID for VAT:	76279197
Official number:	7164041000
Bank account:	SI56 6100 0001 5084 332
Establisher:	MATEJ KLINE, permaculture teacher and planner
Establishment date:	20.10.2016
Manager:	Jernej Domanjko, M.S., mechanical engineering

Initiative for establishment

The establishment of the nonprofit organization Permaculture Institute Maribor (hereinafter PIM) is the result of the current catastrophic trends in global trends in politics, industry, living standards and enormous economic differences between individuals, destructive environmental management, misleading and incorrect public awareness making and immoral, unethical and irresponsible behavior of society. The new generations are fighting on the business, political and socially responsible fronts to improve the state of our planet. This fight was also joined by PIM. We want to prevent the proven destructive behavior of conventional agronomy and other non-sustaining systems from various aspects of our lives. This destructive behavior is a key factor for the current state of our civilization and the Planet.

6

Mission

The Permaculture Institute Maribor is primarily responsible for raising public awareness about sustainable systems, their planning and economic viability, and above all the need for their quick adaptation. At PIM we strive to change the conventional destructive management of natural resources into sustainable nature management, covering a wide range of factors necessary for the quality of life of each individual. PIM meets its mission with its building of demonstration centers, which show a positive contribution to sustainable planning, public presentations and lectures for both Slovene citizens and foreigners. Innovations, improvements, continuous optimization and research in the area of sustainable life systems are part of everyday work on PIM.

Vision

- Granting of an internationally recognized certificate representing superior organic food production and taking into account the sustainable principles of permaculture planning (thus producing quality foods and simultaneously regenerating the environment, which drastically increases the value of nutrients in the crop).
- Construction of educational and demonstration centers throughout Slovenia and conducting education (especially practical presentations) for the interested ones in Slovenia and the rest of the world.
- Spreading PIM's beliefs beyond the borders of Slovenia, global integration with the same-minded and inclusion of the general public in our initiative.

Values

We follow the nature, because it alone manages holistically and sustainably its system and is based on laws that treat all of its parts on an equal footing. Values that respect natural laws, where each part is equally important, are the foundations of the Permaculture Institute Maribor.

Our values can be divided into three sections:

- Caring for the Earth, its living and non-living systems. The center is a life ethic. All living beings have a higher value.
- Care for people. People are the center of the permacultural system. If we can take care of our basic needs ourselves, we do not need to participate in the massive destruction of the Earth.
- Refunds of surpluses in the first two ethical principles. When our basic needs are satisfied and we have managed our homes in the best possible way, we can expand our influence and come to help others to achieve what we already have. We follow the nature, because it alone manages holistically and sustainably its system and is based on laws that treat all of its parts on an equal footing. Values that respect natural laws, where each part is equally important, are the foundations of the Permaculture Institute Maribor.

Our values can be divided into three sections:

- Caring for the Earth, its living and non-living systems. The center is a life ethic. All living beings have a higher value.
- Care for people. People are the center of the permacultural system. If we can take care of our basic needs ourselves, we do not need to participate in the massive destruction of the Earth.
- Refunds of surpluses in the first two ethical principles. When our basic needs are satisfied and we have managed our homes in the best possible way, we can expand our influence and come to help others to achieve what we already have.

Education

A key part of the PIM is a wide range of intensive practical and theoretical education based on good practice of integrating living and non-living systems into wholes, where every part of a living and non-living nature, if properly designed and implemented, helps to increase productivity, reduce the use of resources and higher quality of finished products. We offer a Permacultural design certificate and a three-month traineeship of theoretical and practical knowledge of permaculture. These are just two of the many courses offered by PIM. Check the set of training at www.permakulturni-institut.si.

Supply of ecosystem-based food products (over-organic production) Our demonstration centers offer products harvested without plowing, spraying with plant protection products, excessive watering, fertilizing with artificial fertilizers, use of pharmacy and immoral grips. All products are fresh (local production) and on the day of orders are ready to surrender to our loyal customers, to which they neither offer eco-certified foods of the right quality. So,

through the website www.zabojcekzdravja.si, you can order your own batch of fresh products and make your menu with quality that can not be obtained elsewhere.

Design of sustainable systems.

Included are the systems from most of today's branches. From the construction of dwellings, agronomy, water resources, energy resources and economic systems. Together with our equally thinking colleagues we are planning interesting and urgent systems for them. Whether they are conditioned by higher earnings in the production and sale of foodstuffs, the tendency to self-sufficiency and self-sufficiency, or we can help them to connect to the initiative, where they can even reach the desired goal without big money investments. More about projects at www.permakulturni-institut.si/projekti.

Raising awareness of the general public

Participation in television shows, publishing articles on our web portals, publishing books that describe good sustainable practices, publishing articles in magazines and newspapers, regular public presentations of our demonstration centers, youth projects and projects with kindergartens and participation in trade fairs are just some activities, with which we try to make people aware of the serious problem of the destruction of the planet, and above all the necessary simple solutions that every individual can implement with little effort in his life.

Restructuring of agricultural infrastructure

If we want to feed the world's population with sustainable agronomy, which uses the ecosystem way of production, it will be necessary to adapt a certain part of the agricultural machinery or its infrastructure. The Institute's research activities are concerned with the testing and implementation of new machines and constant improvement of their efficiency for better quality and less demanding agriculture. This is how we connect with the producers of agricultural machinery and together we plan and produce and optimize agricultural machinery for the needs of sustainable production methods.

Construction of demonstration centers

The number of demonstration centers will have a significant impact on the development of ecosystem production in Slovenia and abroad. The more we will be able to put them in, it's easier for the stakeholders to decide on the transition to ecosystem production. Centers provide advice and expert support and help design the emerging systems. All ecosystem producers are connected through the centers, creating a network of people who share experiences, trade in services and exchange products, and they can present their experiences at lectures or online portals of the Permaculture Institute Maribor.

Transferring Permaculture Planners and Linking Equally Thinking to a Joint Initiative

Our initiative is based on the spread of awareness of the importance of sustainable systems, so the key part of the PIM is the recruitment of the same minded people who also want certain changes in the quality of life. With the completion of education, desire for work and other ways of spreading consciousness, everyone can become part of our team and thus add to our common goal. Whether it is volunteering, assistance in the form of an external collaborator, employment in PIM or the establishment of a partner company, material or financial sponsorship, donations, new ideas, promotions and more, are more than welcome ways of assistance. More at www.permakulturni-institut.si/pridruzite_se.

Directive:

The only ethical decision is to accept responsibility for the existence and the existence of our children. Let's do it now!
