

Jožica Rejec, PhD, President of Domel Holding, d.d.

Jožica Rejec has been with Domel d.o.o. since 1978. She started out in R&D as an electrical engineer and was responsible for the design of the function of different types of electrical motor. For her, there was always the challenge of new motors and new projects. In 2004 she completed her PhD in electric motor engineering at the University of Ljubljana. She has been the CEO of Domel, d.o.o. since 2006 and the President of Domel Holding, d.d. since 2014. Since her taking up these leadership positions, the company had built a new programme pillar and received a variety of acknowledgments from the Slovenian Chamber of Commerce, other institutions and several customers. She is the company's ambassador of knowledge and plays an active role in many associations.
